Soft Skills
Team Work, Communication, Problem Solving

PROJECTS

AnimeSL,
Anime streaming platform ⌗

- Introducing our anime streaming platform! It pioneers exciting features like watching and downloading anime, along with a user-friendly admin panel that was developed.
- The backend utilizes Node.js, Express, and MongoDB, while the frontend implements React and Material UI for a seamless interface.

Spotify Clone,
Music streaming platform ⌗

- Enhanced the platform by implementing features like music play, pause, liking, and library creation
- Developed a user-friendly admin panel using Node.js, Express, and MongoDB for the backend, and implemented React with Sass for the frontend.

CrowdFunding, Web 3.0 ⌗

- Engineered a cutting-edge crowdfunding platform on the Sepolia test network using blockchain technology
- Led the creation of a secure backend using Solidity and developed a user-friendly frontend with React and thirdweb technology.
- The platform facilitates effortless creation of crowdfunding campaigns, connecting creators and backers seamlessly.

🏅 AWARDS

1st Place in IBM Hackathon (Call for Code 2022), IBM Innovation Centre for Education 🔗
- Developed a secure messaging application incorporating end-to-end encryption based on the Diffie-Hellman key exchange.
